## Response Summary:

## Parse Worksheet

**Goal:** to understand the structure of the data

**Objectives:** Students will change data into a format that tags each part of the data with its intended use

**Outcomes:** Every element of the data will be broken into its individual parts

### 1. Student Information \*

<i>First Name</i>	Nathan
<i>Last Name</i>	Rusk
<i>Course</i> (e.g. CGT 270-001)	CGT 21000-09
<i>Term</i> (e.g. F2019)	F2021

### 2. Email Address\*

nrusk@purdue.edu

### 3. Visualization Assignment \*

- Lab Assignment

## Understand

**4. Parse Data:** List each field and its data type. Refer to Fry (page 8-9, 2007) for examples of description of different data types (string, float, character, integer), you can also create user defined types (some combination that uniquely identifies data like the Index type in the Fry 2007 page 9 example) \*

Prime TV Shows Data set.csv

S.no - integer, Name of the show - string, Year of release - integer, No of seasons available - integer, Language - string, Genre - string, IMDb rating - float or integer, Age of viewers - string.

**5. Assumptions:** List any assumptions you are making about the data and/or the visualization challenge (aka the project) \*

- Viewer age range is varying.
- Genre of the shows vary
